Elgiloy®	UNS R30003 W.Nr 2.4711
	VV.INI 2.4/11

Elgiloy[®] is a non-magnetic Cobalt-Chromium-Nickel-Molybdenum alloy having a unique combination of very high strength, excellent corrosion resistance and high fatigue strength. Elgiloy[®] is highly resistant to sulfide stress corrosion cracking and as a result is the alloy of choice in the most demanding sour well environments. In seawater Elgiloy[®] is virtually immune to crevice and stress corrosion and pitting even at the highest strength levels and can operate at cryogenic temperatures up to 850°F (454°C).

Applications include springs, torsion bars, seals, medical devices & implants and orthodontic wire. Industries supplied include: Oil & Gas Extraction, Medical & Dental, Aerospace, Defense and Space Exploration.
