

MONITOR EXPANSION REMOTELY

Supply patients with a user-friendly app to track their expansion cases remotely! The V5x device and app work in connection with smartphones to allow patients to take high-quality upper occlusal images and track the number of expansion turns - all from the comfort of home. Doctors can check-in on patient progress on their schedule, without restricting their time to office hours.

Flexible check-in schedule

Track progress in real-time

User-friendly, guided imaging

On-demand tutorials and FAQ
